Art Unit:

**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, drawn to method of channel assignment when received power at base station is measured, classified in class 370, subclass 335.
  - II. Claims 3-4, drawn to method of channel assignment base on cell loading, classified in class 370, subclass 329 .
  - III. Claims 5-8, drawn to method of channel assignment when variance and standard deviation of received power are measured, classified in class 455, subclass 436.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions in this relationship are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group I is a method of channel assignment classified in class 370 and subclass 335, and group II is method of channel assignment classified in class 370 and subclass 329, and group III is method of chimney assignment classified in class 370 and subclass 329 . The subcombination has separate utility such as measurement of received power in base station, measurement of cell loading in the base station, and measurement of variance and standard deviation of received power in the base station.

Art Unit:

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is different than Group II and Group III, restriction for examination purposes as indicated is proper.
